

Come Fly With Us!

INFINITY Fuel Cell and Hydrogen, Inc.

**Work in 2 of the hottest
current industries**

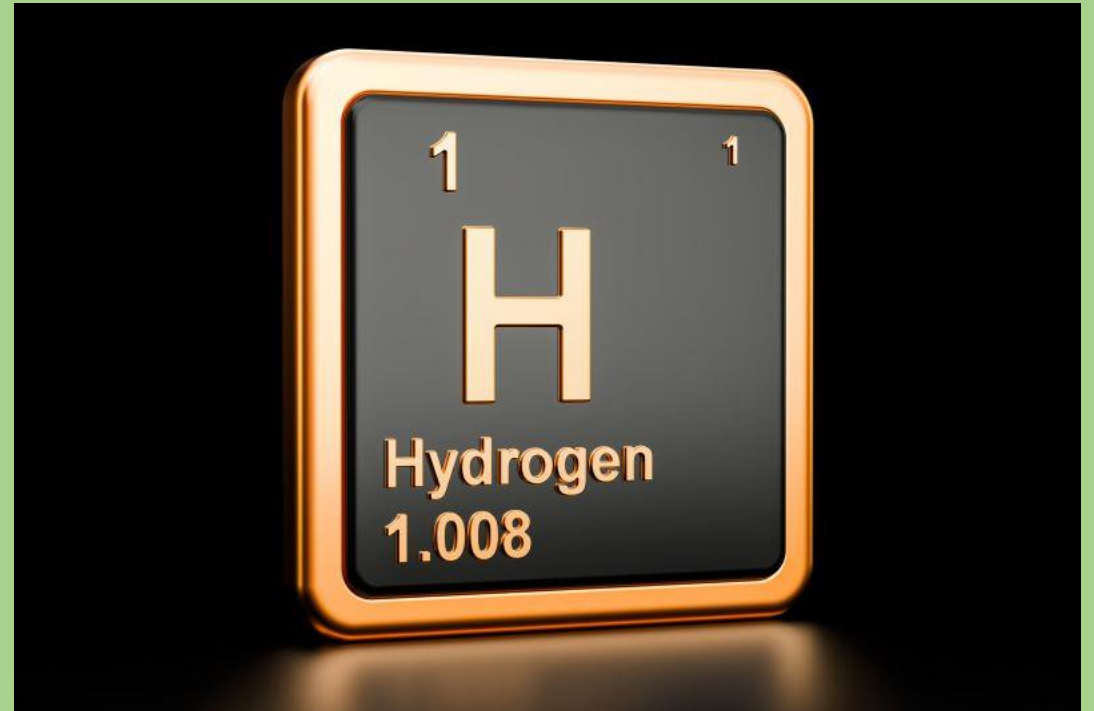

Space...

INFINITY Fuel Cell and Hydrogen, Inc.

...And renewable green energy

CURRENT PROGRAMS

- NASA tipping-point contract with scheduled proof of concept launch on Blue Origin sub-orbital flight
- NASA Glenn Research Center contract for fuel cell component of a lunar regenerative fuel cell system to power a base through the 14-day lunar night
- Underwater Unmanned Vehicle power development project with the Office of Naval Research
- Ongoing contracts with multiple commercial space companies

FUTURE PROGRAMS

- Transitioning of advanced electrolyzer technology for entry into commercial markets
- Expansion of green regenerative fuel cell system design and systems integration capabilities to a variety of off-grid applications
- Green hydrogen designs and products for aviation and marine applications
